

ENABLE PROGRAM

The Applied Cloud Systems Enable Program is a collection of Microsoft funded engagements designed to help customers in their cloud adoption journeys. These engagements provide tremendous value and cover all aspects of the Microsoft cloud including Azure, Dynamics 365, Microsoft 365, and Office 365.

Cloud adoption can be a daunting task, but this program makes that process easier by giving customers access to knowledge and expertise to help drive successful outcomes in their digital transformation.

To begin the process, you can contact us directly or talk with your Microsoft account team for more details.

Note: Funding is based upon availability within the specific offering and requires final Microsoft approval.

WHY CHOOSE US?

We have an extremely experienced workforce with each employee having an average of 15 years of experience in Microsoft technologies. We back that experience with rigorous training and certification requirements to ensure we bring the "A" team to every engagement.

- » Modern Workplace including Microsoft 365, Office 365, and Advanced Security
- » Business Applications from Dynamics 365 covering Sales, Marketing, Customer Service, Field Service, and xRM

ENGAGEMENT OFFERINGS

EXPLORE

A half day session to introduce customers to Azure with deep dives into specific areas of interest such as Governance, Infrastructure, Data and AI, or Application Modernization.

ASSESS

A 3 to 6 week engagement to profile and analyze a customer's environment to identify potential workloads for cloud enablement along with economic justification and deployment planning.

REFINE

A 3 to 7 day engagement, focusing on a specific workload targeted for cloud migration that includes architecture & design sessions as well as proof of concept pilots.

DEPLOY

A 3 to 7 day engagement helping a customer migrate a workload into Azure including resource deployment, configuration, testing, and security.

SECURE

A 1 to 5 day engagement focused on educating customers on security features available in Microsoft 365, Office 365, EMS, and Windows 10 Defender ATP.

TEAMWORK

A 2 to 4 day engagement to help customers identify use cases for Microsoft Teams, assess preparedness, and develop a roadmap.
