

# Applied Cloud Systems understands that working from home and remote collaboration are no longer choices, but necessities for your organization

Quickly set up a work environment with Applied Cloud Systems to maintain productivity, adhere to compliance regulations, and keep your people and data secure while you work remotely during this time of uncertainty.

## WINDOWS VIRTUAL DESKTOP QUICKSTART

### Combating COVID-19 in your organization

Preparing for the possibility of a pandemic, U.S. organizations and universities are starting to talk about what online learning could look like in the event that physical locations need to be shut down over growing coronavirus infections.

As the number of confirmed cases of the new coronavirus rises across the United States, hundreds of academic institutions have shuttered, with major universities shifting to online coursework to protect their students.

**Microsoft and Applied Cloud Systems provide customers with a quick and easy rollout of Windows Virtual Desktop to provide organizations with high-performance desktops and workstations, or even published applications with Azure.**

### Applied Cloud Systems will deliver a QuickStart to:

- Deploy Windows Virtual Desktop (WVD) on an existing tenant infrastructure. If the tenant is not deployed then Applied Cloud Systems can stand-up the core infrastructure for the deployment.
- Deploy the host pool, Azure AD resources, and infrastructure to support WVD. If determined by latency Applied Cloud Systems can optionally deploy Traffic Manager and infrastructure in Azure to optimize for your needs.
- Work with the organization to publish apps, work with FSLogix and script access for grouping for user access and administration of the installation.
- Provide documentation for deployment and optionally can provide managed services for this installation.
- Work with the organization on gold image for host deployment

### Get the Benefits of WVD with Applied Cloud Systems:

- Virtualize both desktops and apps, then assign and connect users to them
- Virtualize O365 ProPlus and deliver it to your users in an optimized environment
- Reduce your CAPEX costs by lessening the impact of hardware product life cycles
- Lower costs by pooling multi-session resources and scale as needed with our scale manager solution
- Reduce the number of virtual machines in your environment or BURST your existing systems into the cloud
- Bring your existing Remote Desktop Services (RDS) and Windows Server desktops and apps to any computer with ease (even Citrix or VMware environments)
- Publish as many host pools as you need to accommodate your diverse workloads
- Reduce your CAPEX costs by reducing the impact of hardware product life cycles Provide a unified and simplified management experience for your admins.
