

Applied Cloud Systems COVID-19 Rapid Delivery Offers

When working remote is no longer a choice, but a requirement

Windows Virtual Desktop

Applied Cloud understands the urgency for organizations and universities to efficiently execute solutions to a remote working environment. Microsoft and ACS have created a Rapid Delivery model that will quickly deploy **Windows Virtual Desktop** to support the growing need for work from home across all industries as well as Remote Teaching and Learning in Academia.

Applied Clouds Rapid Delivery offer includes:

- Deployment/Hardening if Azure Governance via ACS Cloud Adoption Framework(CAF).
- Establish use case to deliver Minimally Viable Product (MVP).
- Deploy Desktop or Application Groups.
- Pilot implementation of 25-50 concurrent users.
- Scale Planning for Production Deployment.
- 30-day free trial of Cloud Control for WVD.

Windows Virtual Desktop Features

- **Deliver** the only multi-session Windows 10 experience
- **Enable** optimizations for Office 365 ProPlus
- **Migrate** Windows Server (RDS) desktops and apps
- **Deploy** and scale in minutes

Cloud Control for WVD Features

- **Client Ownership:** The entire solution is deployed in a clients subscription. Data and configuration remain in their control.
- **Flexibility:** An adaptable environment based on current needs for system, software, users, etc.
- **High Throughput:** Easily deploy hundreds of nodes within a pool with guaranteed results
- **Configuration:** Manage different confirmations for each host pool to optimize for different usage scenarios
- **Autoscaling:** Includes metric and session-based scaling support for GPU-based workloads
- **Image Management:** Easily and seamlessly transition to new images and push updates
- **Vision Control:** Revert to past instances and images as needed.
- **Monitoring:** Output logged for trouble shooting and optimization
